UI issues still to consider

Follow-up to the 2026-09-11 review PDF. Every item from that list has shipped. There is nothing left to consider from the review.

Resolved from the review list

Severity	Issue	What shipped
High	Staff headings showed <code>cust_1</code>	Ledger stores names (<code>customer.put</code>). Staff UIs typeahead customers from edge (<code>GET / customers</code>) and review by name.
High	CS/sales/accounting HTML had no login	<code>verae-staff-session :3027</code> . Set <code>STAFF_AUTH=1</code> and <code>STAFF_SESSION_URL</code> on department servers.
Med	Catalog was a bibliography	Catalog index is cards (Start here / Architecture / Modules).
Med	Fleet identity field truncated	Two-row add-machine form; identity path is a wide field plus a filename picker.
Med	Disabled machines looked like faults	Intentionally disabled cards are grey (<code>disabled</code>), not degraded yellow.
Low	Portal statement empty cells in a table	Empty lists use the same card empty state as invoices.
Low	Overflow menus off-screen	Menu flips upward when near the bottom of the viewport.
Low	Simulator empty console was a black void	Placeholder: “Run a step to fill this trace.”
Med	Swagger <code>/docs</code> stock	Left as vendor Swagger. Title + banner: “OpenAPI explorer — stock Swagger UI for integrators.” Not skinned.
Low	access-staff and CS HTML twins	Shared template in <code>verae-staff-ui</code> (<code>review.html</code> + tokens). Both servers load it in the monorepo.
Low	Staff cookie host-scoped	<code>STAFF_COOKIE_DOMAIN</code> / <code>STAFF_COOKIE_SECURE</code> plus nginx example on <code>verae-staff-session</code> .

Still to consider

None. The review backlog is empty.

How to use each surface

- **Operator** <http://127.0.0.1:3850/> — Fleet (replicas, overflow, grey disabled machines), Trace, Docs.
- **Staff CS** :3011 — type a customer name, Review, credit in USD. `STAFF_AUTH=1` redirects to :3027.
- **Sales** :3012 — review / quote by name.
- **Accounting** :3013 — review + QuickBooks IIF / CSV.
- **Staff plane** :3025 — same review/credit after authz.
- **Customers** /portal — masked API key, empty invoice/statement cards.
- **Ops** /admin — customer list + edit drawer.
- **Lab** simulator :3847.
- **Catalog** <https://zapier.georgelambert.org/> — card index, system-ui.
